

BRAVURA WORKFLOW ORCHESTRATION

ORCHESTRATOR

Bravura's Orchestrator gives the funds and wealth industries a leading workflow orchestration solution that delivers double-digit percentage savings. By organising, managing and automating complex workflows that involve multiple tasks, systems and teams, you can eliminate operational frictions while knowing you have the infrastructure to connect to your future systems with ease.

Orchestrator delivers customisable workflows for enhanced, low-touch efficiency by digitising any number of disparate activities and systems. Through its powerful modelling technology, you can customise the use of any platform to achieve robust, repeatable outcomes.

The highly configurable system enables you to create the reporting dashboards you need while flexible task allocation and tracking ensure optimal workload management. Additionally, real-time reporting and management information give you the power to monitor performance, identify bottlenecks and drive continuous improvement.

BENEFITS

Cost-saving

Create faster processes with fewer errors by automating manual tasks and seamlessly connecting them with existing systems.

Increased productivity

Increase operational capacity, improve accuracy and free up time by optimising workload management.

Continuous improvement

The continual learning approach accommodates inefficiencies and accounts for process modifications so you can easily adapt to client and industry change.

Enhanced customer experience

Automate and standardise communications with customers while minimising manual input.

Audit and control

Capture information and ownership of tasks automatically for instant tracking and reporting of operational SLAs and critical obligations.

Management oversight

Orchestrator eliminates the need to log into different systems while it lets you view information from different sources via a single interface.

ORCHESTRATOR: MAKING WORK FLOW

Orchestrator connects fragmented processes and turns them into automated, tailored business workflows that optimise workload management. One leading firm's early results demonstrated almost a 60% reduction in manual processing.

By using flexible connection types, including APIs, Orchestrator integrates with any platform or system, ensuring smooth data exchange and seamless interoperability. This brings a new level of control and transparency as it orchestrates sequences of automated and manual tasks and orders them around predetermined workspaces. It means tasks are pushed through to the right person, at the right time. For processing unique cases, it also supports exception handling within workflows.

Business process modelling and automation

Automate complex, repetitive administrative tasks and execute complex workflows with ease.

Precise, regulated process modelling

Apply BPMN 2.0 standards to optimise processes while remaining user-friendly.

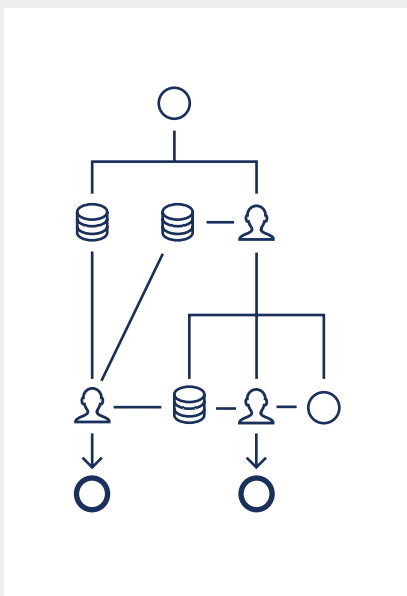

Real-time insights and continuous improvement

Understand workflow performance, task status, costs and measure efficiency using in-depth task monitoring tools.

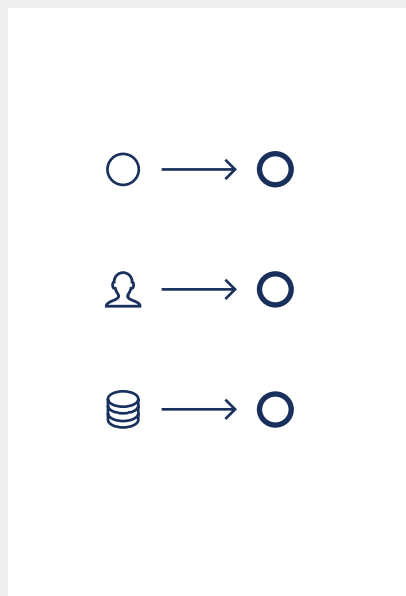

System-agnostic

Connect legacy and new technologies quickly to create a complete business-wide system architecture.

Fragmented systems & teams

Automation

Orchestration

HOW WE DELIVER IT

Delivering Orchestrator starts with the mapping of a client's existing workflow processes to understand how you can best deploy the solution and remove the maximum amount of business friction.

Our long experience in deploying Orchestrator means we have a library of templates and actions

to start the transformation process and make sure actions are repeatable. This streamlines the implementation process.

Orchestrator is cloud-deployed which ensures scalability and resilience of the operating environment.

WHY BRAVURA?

We have a proven track record. Every month we process £1 trillion's worth of transactions on behalf of global financial institutions. Our market-leading platform, financial messaging and integration solutions power mission-critical parts of many of these businesses. We are trusted not only for the quality of our technology but for its resilience in all market conditions.

We are the technology supplier of choice to the leading fund firms, asset servicers and wealth providers, serving the largest firms in these sectors. Our people are recognised for their exceptional know-how in the industry.

We continue to push out the boundaries with a relentless focus on the future, working with our clients and partners to develop innovative solutions that meet the industry's changing requirements.
