

BRAVURA BABEL

Bravura Babel is the industry's only network of fund transaction networks. With a single connection, firms can send and receive trade, settlement, and asset servicing information with any participant directly or across any fund network, eliminating the need to manage multiple connections and teams. This creates immediate operational efficiencies and reduces the risk of manual processing.

Babel automates the entire fund transaction lifecycle to give firms a holistic view of all investor trading activity. The built-in data validation, enrichment, and real-time monitoring enhance accuracy and control.

The cloud-native solution scales as trading volumes change, removing cost and complexity while staying aligned with evolving formats, standards and regulatory requirements.

BENEFITS

Gain unrivalled connectivity

One connection to Babel connects firms to all the fund transaction networks and their members.

Achieve full back-office integration

Fund managers and distributors can integrate with any TA platform via their preferred fund network, or directly via Babel.

Scale with confidence

Cloud-native infrastructure flexes to meet demand with minimal operational burden.

Optimise your data

Automatically enrich, validate and transform message flows and eliminate manual intervention.

Whole of market view

Gain real-time, unified visibility of all client account activity from every fund transaction network via a single connection and uncover operational issues fast.

Fast onboarding

Accelerate client onboarding without connectivity format constraints.

KEY FEATURES

Bravura Babel offers fund managers, asset servicers and distributors a smarter way to trade. It enables frictionless fund order, settlement and post-trade processing with the widest range of trading partners possible. It removes the burden of multiple integrations while enhancing operational control with real-time oversight.

One connection to the entire funds ecosystem

Connect once using your chosen format (including API) to access every major fund transaction network, fund manager, distributor and transfer agent.

Complete trade lifecycle management

Execute and monitor the full trade journey from order placement to settlement to post-trade servicing, including dividends, transfers and more, using a single, transparent system.

Real-time visibility and control

Modern interface and unified dashboard deliver oversight, monitoring, and intervention across all message flows as well as the ability to create/amend investors and agents.

Firms can also access a full range of network statements, client reporting tools and management information reports.

Smart message orchestration

Babel sequences bulk messages for proper execution, ensuring optimal processing order and trade completion.

Open, interoperable architecture

Designed to integrate with any back-office infrastructure by using your preferred connectivity format.

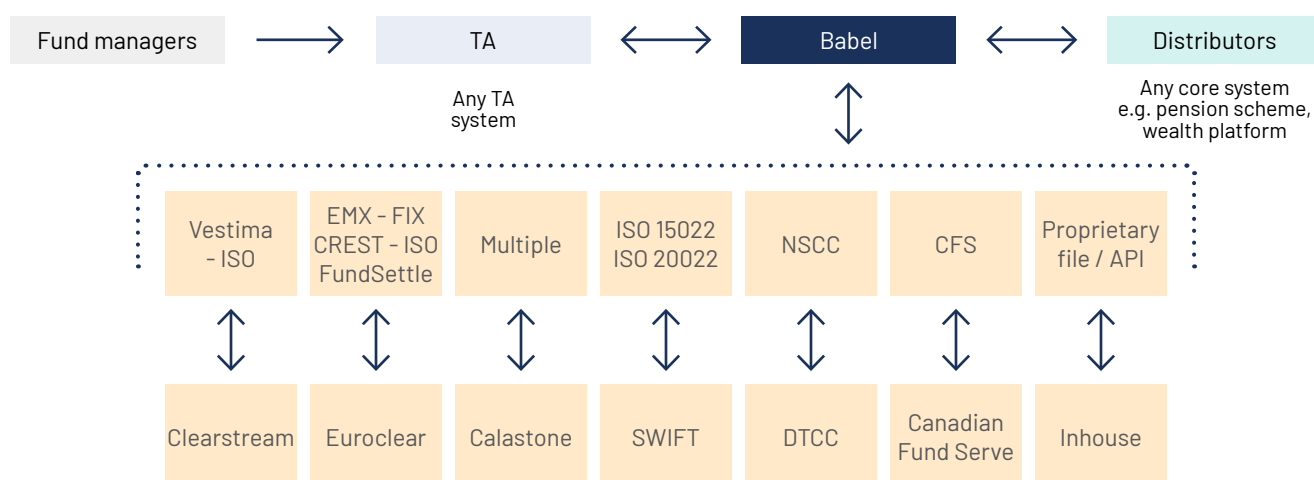

No-code implementation

Deployment and upgrades are tested and implemented outside business hours with no disruption to BAU operations.

Built-in resilience

Secure cloud-native solution ensures continuous, reliable information exchange.

HOW BABEL WORKS

WHY BRAVURA?

We have a proven track record. Every month we process £1 trillion's worth of transactions on behalf of global financial institutions. Our market-leading TA platforms (Bravura Rufus, GTAS, GFAS), financial messaging (Bravura Babel) and orchestration solutions (Bravura Orchestrator) power mission-critical parts of many of these businesses. We are trusted not only for the quality of our technology but for its resilience in all market conditions.

We are the technology supplier of choice to the leading fund firms, asset servicers and wealth providers, powering the largest firms in these sectors. Our people are recognised for their exceptional know-how in the industry.

We continue to push out the boundaries with a relentless focus on the future, working with our clients and partners to develop innovative solutions that meet the industry's changing requirements.
